Heater Analysis – Best Far Infrared Heaters Available!

This graph shows the Black Bio Spectrum heaters for Luxspas International with relation to a perfect black body. A perfect black body is an infrared emitter that absorbs as much energy as it puts out. The human body (purple line) operates at 9.4 on the scale and you can see the Black Bio Spectrum Heater (green line) is within the 95% of the black body. This means your body will be very receptive to infrared heat being produced by the Black Bio Spectrum heater from Luxspas International.
